| 1 | <p>Debi Raitz</p> <p>Easter may be in just a couple days, but we have until April 30th to post our egg shaped salts, bunny salts, chick salts (I'm sure there's tons of those), lamb salts - anything that might be related to Easter. And let's not forget our Jewish friends...So any salt that might be related to Passover is also welcome to be posted.</p> <p>Debi</p> | 04-02-2010 05:26 PM ET (US) |
| 2 | <p>sandyj</p> <p>Is there any difference in salts shown on Ebay for sale as Passover salts than the regular silver or other salts? Forgive me if I am using the wrong terminology. I must admit that I have wondered for some time.</p> | 04-03-2010 04:55 PM ET (US) |
| 3 | <p>Nancy Villaverde</p> <p>All I got on ebay search for Passover salt was coarse grained salt or holders for salt water used in Passover rituals. What title did you see, Sandy?</p> | 04-03-2010 08:17 PM ET (US) |
| 4 | <p>Debi Raitz</p> <p>I don't know for a fact that there are any specific salts or materials for open salts for Passover. I remember there was a big silver company in Israel that sold many silver and glass salts. The pictures are still on the New Salts page, but the links are no longer functional. Guess I have a lot of website house cleaning to do. Just wanted to make sure everyone was included.</p> <p>Debi</p> | 04-04-2010 01:28 AM ET (US) |

My egg is the same as Nancy V's except it is vertical and hers is horizontal. The colors are the same, for some reason my color in the photo came out too dark and orangy. It is a pure white base egg, with lovely flowers.

Nancy's egg picture cleaned up with Paint Shop Pro with just a couple clicks.

Maybe a bit too much if the blue background is supposed to be the same aqua as the bunnies. I have found that most pictures sent to me have way too much red in them. With the program, which I have used for about 13 years, you put a marker on what is supposed to be white and it just cleans it all up in one click. If you do a lot with pictures, I highly recommend it. I think it's what Lyleann uses too.

Nancy D, at first I thought you had turned an egg like mine on end. Funny that they made it both ways. Maybe yours was originally a toothpick. I used to have Photoshop, but now I use the iPhoto that comes installed on my Mac. It's basic but very good with what I need for posting photos on the internet.

Nancy V. Perhaps you are right and it is a toothpick. I have had it for many years and it was sold to me as a salt and I never questioned it until now. It is so beautiful and whatever it is, it stays as a salt in my cabinet. I never saw the horizontal egg until you posted it.

Hi Nancy D. I've seen several of the horizontal eggs like this, but the flowers are usually, as we say in Hawaiian pidgin "bust up." I have a few salts in my collection that I really like that are something else, in both meanings of the term.

Jane: I've always kicked myself for not bidding higher but she had some damage. (Looks like a "she" doesn't it?) Basket handle is missing and ears were broken and glued. Still so very cute and I've never seen another.

Hi, Debi: I have faience duck with a lot of damage, but I am so glad I decided to buy him because I've never seen another. And from a distance he looks pretty good.

None of them are mine. Maybe I should say I collect salt pictures instead of salts.

| Hi All | | |
| Going to post my Easter Rabbit Salt. It was probably made as an egg cup or holder cast from a heavy material. However it is a salt, as my Granddaughter sent it to me a few years ago for my salt collection. Have to leave it on top of the cabinet as the little kids all want to look at it, and as you can tell from the picture a few sticky little hands have held it. | | |
