Catalogue Note: Jim Rose noted "four specimens known in blue" in his catalogue for the 1954 Corning exhibition. He does not however make a differentiation as to the shades of blue, e.g. peacock or medium as recorded by Dorothy Neal. The Corning Museum example is medium blue, which is also listed as unique by Neal. The salt offered here is the best possible example of an important piece of lacy glass marked for the maker, a rare occurrence in this period of glass.
