

# H&J 419

H&J Image

Uncommon mercury glass salt.  
Most are clear glass with silver.  
H&J 419 is a blue glass  
pedestal shape with  
the silvering only  
within the base.

Salt shown below is also blue glass.

Two of the best known makers of  
mercury glass were the New  
England Glass Co. in the US and  
Varnish & Co. in England.

Bottom right is the opposite of  
the blue one pictured in H&J  
with silvering in the bowl  
instead of the base.
